

A Letter to the Citizens of Michigan from the Governor

I am pleased to release the sixth edition of the *Michigan Financial Focus*, an annual report on Michigan's financial status and the health of our State's checkbook. I hope you will use this report to learn more about the financial condition and operations of your government.

Fiscal year 2000-2001 (October 1, 2000-September 30, 2001) marked another successful year for Michigan. While revenues declined because of a slowing economy, State government reduced its budget, used portions of our Rainy Day Fund, and took other actions to keep Michigan's budget balanced, preserving our strong financial position that we have worked so hard to attain. As a result, your State government remains on sound financial footing, even in tough economic times.

This year, I am very proud that Michigan is one of only two states in the country to implement the new financial reporting requirements of the Governmental Accounting Standards Board (GASB). GASB is the national standards setting body that determines accounting and financial reporting standards for all governments. Two years ago, this board released the most comprehensive change ever impacting governmental financial reporting, called GASB Statement No. 34.

After years of study, GASB determined the former governmental financial reporting model needed an overhaul because it did not provide a comprehensive measure of the entire government's financial position and because it did not use full accrual accounting like the private sector. Our financial management staff

implemented GASB 34 this fiscal year, one year earlier than required, and as a result, we now have new government-wide financial statements for Michigan that show our State's financial position in a manner that we hope is easier for citizens to understand and interpret.

Using this new financial information, you will be able to determine more easily whether the financial position of your state government is better or worse than the previous year. The new statements now include all long-term assets and debts. For the first time, we reported a value of \$12.1 billion for our State roads, bridges, and other infrastructure assets, and we disclose the condition of those assets in our financial statements. This and other facts about our financial condition are highlighted in the other articles in this issue and are available in more detail in the State's Comprehensive Annual Financial Report.

In a more general sense, Michigan's financial management capabilities continue to receive high marks from outside the government, even in these challenging times. In February 2001, *Governing Magazine* rated all 50 states on government performance. Michigan received an overall grade of A-, the highest of any state. In the area of financial management, we received an A- grade. Only the state of Utah received a higher grade for financial management.

The Wall Street bond credit rating agencies also continue to believe in Michigan's ability to properly manage our financial resources. Standard & Poor's and Moody's Investors Service recognize our financial strength and

discipline by continuing to award us the highest credit rating available, something only nine other states enjoy.

Today, many governments lag behind the private sector in publishing their financial results in a timely manner. While many of the world's most complex companies publish their financial statements in less than 20 days, the average time required for state governments is about 175 days. In 2002, I challenge our financial management staff to accelerate how quickly we publish our financial reports. The goal for this year is to cut the time almost in half from what most large governments require. We think this effort to improve timeliness for financial reporting is something all governments will embrace in the coming years, as governments seek to achieve the same improvements we have seen recently in the private sector.

For more detailed information about your State's finances, you can access the fiscal year 2002-2003 Executive Budget, the fiscal year 2000-2001 *State of Michigan Comprehensive Annual Financial Report* (SOMCAFR), and other information about Michigan at the Office of the State Budget Internet homepage: www.state.mi.us/dmb/ofm or <http://www.state.mi.us/dmb/budget>. We can also answer your questions about government financial issues at 517-373-3029.

John Engler

Government-wide Activities

For the first time, the State's financial statements report information about its financial position and operating results, taken as a whole. These government-wide statements include assets, liabilities, and operating results, using accounting practices similar to those used by businesses in the private sector. These statements exclude fiduciary assets, such as pension funds, because those monies belong to participating members and not the government.

Prior to the new accounting standard, GASB 34, governments reported most of their revenues and expenses on a more short-term perspective and the financial statements focused more on individual funds. The new statements combine all relevant funds and, therefore, readers can evaluate the financial position of the entire State more easily. Key differences between these government-wide totals (using accrual accounting) and the amounts reported in the fund-level financial statements (using modified accrual accounting) include:

- Revenues are recognized when earned, regardless of when collection is made.
- Expenses are recorded for long-term obligations, such as accrued vacation time, regardless of when payment is made.
- Certain expenses that are not recorded in the fund-level statements, such as depreciation expense and the amortization of bond premiums and discounts, are recorded in the government-wide statements.
- Certain transactions that resulted in revenues and expenditures in the fund-level statements have been reversed and recorded as assets and liabilities in the government-wide statements. Examples include bond proceeds, capital lease payments, payment of retirement benefits, and others.

At September 30, 2001, the State had government-wide assets of \$34.4 billion and liabilities of \$11.9 billion, resulting in net assets of \$22.5 billion. Of the \$22.5 billion in net assets, \$15.1 billion represents amounts invested in capital assets (buildings, equipment, infrastructure) and another \$6.0 billion is legally restricted to be spent on specific programs. The remaining \$1.4 billion, referred to as unrestricted net assets, do not meet the definition of restricted assets and may be used at the State's discretion, but generally there are limitations on use based on State statutes.

On a government-wide basis, the State collects and spends approximately \$40 billion per year to provide services to the citizens of Michigan. The following graphs reflect government-wide revenues and expenses of the State's funds (excluding fiduciary funds and discretely presented component units).

Government-wide Revenues
Fiscal Year 2000-2001
(in billions)

Government-wide Spending
Fiscal Year 2000-2001
(in billions)

Budget Stabilization “Rainy Day” Fund

Michigan’s “Rainy Day Fund,” formally referred to as the Counter-Cyclical Budget and Economic Stabilization Fund (BSF), was established in 1977 to serve as the State’s “savings” account and assists in stabilizing revenues and employment during periods of economic recession and high unemployment. The fund provides a safeguard to protect critical programs for Michigan’s citizens when the State experiences an economic downturn. Its fund balance also helps reduce borrowing costs. As evidenced by the chart below, over a ten-year period, the fund balance has increased from \$20 million to \$1.26 billion in September 2000. BSF had a September 30, 2001 balance of \$994.2 million.

During fiscal year 2000-2001, state revenues declined and budgets for fiscal year 2000-2001 were adjusted downward. By the end of fiscal year 2000-2001, net general fund revenues declined 8.1% from the prior year. As a result, the Legislature authorized transferring \$270.0 million from BSF to the General Fund to ensure a balanced General Fund budget.

In addition, the State transferred \$32.0 million from BSF to the School Aid Fund for the purpose of making

appropriations to school districts and intermediate school districts. An additional \$35.0 million was transferred to the State Trunkline Fund to support the Department of Transportation’s road and bridge construction costs associated with the *Build Michigan III* program.

As the State weathers the economic downturn in fiscal year 2001-2002, the Legislature has authorized transferring up to \$505 million from BSF to the General Fund and the School Aid Fund to balance those budgets.

Budget Stabilization “Rainy Day” Fund (Fund Balance)

School Aid Fund

Michigan continued its priority for education by spending \$11.0 billion in fiscal year 2000-2001 for its K-12 school program. The program is managed in the School Aid Fund (SAF), which was created in 1955 by an amendment to the 1908 State Constitution, and the 1963 State Constitution provided for its continued existence. Its purpose is to furnish aid to public schools, public school academies, and the intermediate school districts of the State. Financial assistance is based on a statutory formula that uses, among other items, pupil membership counts and homestead/non-homestead taxable value data.

SAF receives its revenues from six principle sources: (1) the constitutional dedication of 60% of the collections of sales tax imposed at a rate of 4% and all of the collections of the sales tax imposed at the additional rate of 2%; (2) a portion of the personal income tax; (3) State Lottery earnings; (4) approximately 33% of total State use tax revenue; (5) 8.1% of the gross casino gaming revenue; and (6) portions of the cigarette, liquor, industrial and commercial facilities taxes, and federal funds. During fiscal year 2001, SAF received \$9.4 billion in taxes, \$587.0 million in Lottery revenues, and \$385.2 million from the General Fund, and \$148.6 million in federal funding. The accompanying chart shows funding sources that supported education.

School Aid Fund Fiscal Year 2000-2001 Funding Sources (in billions)

Source	Amount
Sales Tax	\$4.6
Income Tax	2.0
Property Tax	1.5
Miscellaneous Taxes	1.3
State Lottery Fund Transfers	0.6
General Fund and BSF Transfers	0.4
Other	0.3
TOTAL	\$10.7

In fiscal year 2001, for the fourth year in a row, the State spent more state dollars on K-12 education than it spent in the entire general fund general purpose budget. Annual expenditures of SAF were approximately \$11.0 billion, \$10.1 billion, and \$9.6 billion for fiscal years 2001, 2000, and 1999, respectively. In fiscal year 2002, all school districts will receive funding of at least \$6,500 per pupil – a threshold that defined a wealthy school district prior to school finance reform.

Tobacco Settlement Revenues

In November 1998, the State joined 45 other states and five territories in a settlement with the nation’s largest tobacco manufacturers to reimburse those entities for health costs related to smoking. The State received \$280.7 million during fiscal year 2000-2001, bringing the total received since the settlement to \$647.1 million. In accordance with the settlement agreement, the payments will continue in perpetuity and are expected to be \$8.5 billion over the next 25 years, subject to adjustments for inflation and usage volumes.

Legislation requires the State to deposit the proceeds in the Tobacco Settlement Trust Fund and the Merit Award Trust Fund. Spending from the Tobacco Settlement Trust Fund supports a variety of programs as determined by the Legislature, including health and aging research, elder prescription insurance coverage, and long-term care services. The Merit Award Trust Fund supports the Michigan Merit Award program, which provides \$2,500 awards based on student achievement on Michigan Education Assessment Program (MEAP) or other achievement tests. The award may be used for education and training in a variety of settings. Primarily, Michigan high school seniors use their Merit Awards to defray the cost of their first year’s tuition at one of Michigan’s universities or community colleges. In the first two years of the program, more than 91,000 high school seniors qualified for a Michigan Merit Award.

Spending of tobacco settlement proceeds totaled \$229.5 million in fiscal year 2000-2001.

Tobacco Settlement Spending Fiscal Year 2000-2001 (in millions)

General Fund

The General Fund is the State’s principal operating fund. Each of the 20 principal departments account for a portion of its financial resources and transactions within this fund. In fiscal year 2000-2001, the General Fund collected revenues of \$21.4 billion, accounting for 61% of the State’s general governmental operations. Expenditures in the General Fund account for 58% of the State’s general governmental operations. At the end of fiscal year 2000-2001, fund balance totaled \$1.9 billion, including \$28.1 million of unreserved fund balance. Reserved fund balance represents amounts not available for spending because legal restrictions on the assets exist or the amounts have already been appropriated and will be used in subsequent years. The accompanying graph shows the different components of reserved fund balance.

General Fund Reserved Fund Balance As of September 30, 2001 (in millions)

Reserved Types	Amounts
Restricted Revenues	\$1,006.6
Noncurrent Assets	423.1
Multi-year Projects	308.1
Encumbrances	137.6
Revolving Loan Programs	5.0
TOTAL RESERVED FUND BALANCE	\$1,880.4

During fiscal year 2000-2001, the Legislature authorized the use of the Budget Stabilization Fund (the Rainy Day Fund) to help keep the General Fund in balance, while the State experienced revenue declines. Even with budgetary reductions, state agency program managers continued to responsibly manage programs within appropriated amounts. Once again, no state agency exceeded its budget. For the fiscal year, the net lapse (amounts appropriated but not spent) by State departments and agencies totaled \$50.0 million. When combined with the legislative and judicial branches, net General Fund lapses for the state totaled \$57.7 million.

Total revenue and transfers from other funds for fiscal year 2000-2001 were \$22.1 billion. The General Fund receives revenues from two major revenue sources: taxes of \$11.0 billion and revenues from the federal government comprising another \$8.3 billion.

General fund expenditures and transfers to other funds for fiscal year 2000-2001 were \$22.3 billion. The General Fund spends the majority (77%) of its financial resources on health services, family independence services, education, and public safety and corrections.

Transportation

As the State’s primary transportation agency, the Michigan Department of Transportation (MDOT) develops the long-range plan for transportation facilities, services, and airport improvement projects; plans and develops public transportation systems; and partners with private and other public sector entities to build and maintain significant portions of those facilities. MDOT oversees the construction, repair, and maintenance of the State highway system, including 27,300 lane miles of roads and 5,700 bridges. Transportation-related spending totaled \$3.2 billion during fiscal year 2000-2001, which represents approximately 9% of total governmental fund expenditures.

MDOT receives funding from taxes collected on motor fuels and motor vehicle registrations; miscellaneous revenue such as license and permit fees, sales of maps, plans and publications; interest earnings; and federal and local participation on various projects. In fiscal year 2000-2001, MDOT also issued bonds and notes to advance and accelerate the completion of the *Build Michigan II and III* highway programs and various infrastructure projects within the State.

The accompanying graph depicts fiscal year 2000-2001 revenues for MDOT.

Infrastructure Assets

For the first time, the State’s financial statements report infrastructure assets. Infrastructure assets are long-lived capital assets that normally are stationary in nature and typically can be preserved for a significantly greater number of years than most other capital assets. Examples of infrastructure assets include roads, bridges, railroads, tunnels, drainage systems, water and sewer systems, dams, and airports. Most of the State’s infrastructure assets are the responsibility of the Department of Transportation.

The State uses an asset management system that measures and assesses the maintenance condition of its roads and bridges. Michigan’s goal is to have 90% of its roads and bridges in good condition by 2007. Currently, 78% of roads and 77% of bridges are assessed in good condition.

Michigan has invested over \$12 billion in its roads, bridges, and other infrastructure assets. Following are the historical costs of these assets as of September 30, 2001 (in millions).

Infrastructure Assets
As of September 30, 2001

Asset Types	Amount
Roads	\$10,379.0
Bridges	1,215.9
Ramps	419.5
Railroads	35.7
Rest Areas	35.0
Miscellaneous	8.1
TOTAL	\$12,093.2

Debt Service

The State uses borrowing to pay for a variety of construction, repair, and renovations of government buildings, highways, and higher education facilities. The State borrows through bonded debt consisting of general obligation (GO) bonds and revenue bonds. GO bonds are backed by the full faith and credit of the State and are repaid from tax revenues and other sources. Revenue bonds typically finance a specific project and are repaid with revenues generated from the use of the project. Revenue bonds are not general obligations of the State.

As of September 30, 2001, the State’s general obligation debt totals \$1.0 billion, a net increase of \$101.5 million from the previous fiscal year. The increase in total debt outstanding resulted from the issuance of new debt, issuance of refunding debt, and debt service payments on outstanding debt. In fiscal year 2000-2001, debt service costs totaled \$470.4 million.

Wall Street bond credit rating agencies Standard & Poor’s and Moody’s Investors Service have recognized Michigan’s financial strength by awarding their highest credit ratings possible to the State, one of 10 states with the highest ratings. As demonstrated below, Michigan ranks favorably with other states, when comparing debt in relation to personal income and debt per capita.

Net Tax Supported Debt as a Percentage of Personal Income		Net Tax Supported Debt Per Capita	
Lowest rate (NE):	.1%	Lowest debt (NE):	\$25
Highest rate (HI):	11.0%	Highest debt (CT):	\$3,037
Average:	3.0%	Average:	\$820
Michigan:	1.6%	Michigan:	\$449
Rank:	18 th best	Rank:	20 th best

Financial Reporting and Fiscal Oversight

The State of Michigan uses generally accepted accounting principles (GAAP), to account for all assets, liabilities, revenues and expenses of the State, including the information provided within this publication. The State annually processes approximately 27 million detailed accounting transactions using the Michigan Administrative Information Network (MAIN) to track and maintain these entries. Using MAIN, the Office of Financial Management prepares and publishes the SOMCAFR, which is audited by the Legislative Office of the Auditor General.

The Chairman of the Governmental Accounting Standards Board recently presented Michigan with a Certificate of Recognition to acknowledge the State’s implementation of GASB Statement No. 34 in preparing its fiscal year 2000-2001 SOMCAFR. The certificate recognizes that early implementation of Statement 34 is a testament to Michigan’s professional leadership, initiative, and commitment to improving public accountability. To-date, approximately 200 governmental entities have implemented the provisions of Statement 34 of the

approximately 87,500 states, counties, cities, school districts, and other governmental entities in the nation.

Michigan has again been recognized for its leadership and high professional standards in financial reporting. For the fourteenth straight year, the State achieved the Certificate of Achievement for Excellence in Financial Reporting award from the Government Finance Officers Association (GFOA) for the fiscal year 1999-2000 SOMCAFR. GFOA also presented Michigan its fifth consecutive Award for Outstanding Achievement in Popular Annual Financial Reporting for its 2000 publication of the *Michigan Financial Focus*, which was issued in 2001.

For the fiscal year ending September 30, 2002, the State’s financial management staff is expediting the year-end closing process so that the fiscal year 2001-2002 SOMCAFR will be published by December 31, 2002. Achieving this goal will place Michigan first in the country to publish its financial statements within 90 days of the close of the fiscal year. Of the 48 states producing CAFRs, the average time required for publication is 175 days.

Trends in Tax Revenue

There are currently 46 state and local taxes in Michigan. Taxes represent a significant portion of the revenues the State uses to fund programs and services to citizens; totaling 57.9% of government-wide revenues in fiscal year 2000-2001.

During fiscal year 2000-2001, the State’s governmental funds recorded tax revenues of \$22.5 billion. Three specific taxes comprise nearly 70% of State taxes:

- Personal income taxes represent the single largest tax revenue, consisting of \$7.3 billion, or 32.5% of total taxes. Adopted in 1967, this is a direct tax on income. Beginning in calendar year 1999 and continuing through 2004, the tax rate is being reduced .1% per year until the rate reaches 3.9%. In calendar 2000, the reduction was accelerated from 4.3% to 4.2%, saving taxpayers approximately \$130 million.
- Sales taxes are the second largest source of tax revenue; comprising \$6.3 billion, or 28.4% of total taxes. This tax was adopted in 1933 and is derived from the retail sale of tangible personal property for use or consumption, and from other sources. In 1994, voters approved an increase in the sales tax rate from 4% to 6%.
- Single business taxes are the third largest tax source; generating \$2.0 billion, or 9.0% of total taxes. This tax is a value-added tax based on business income, compensation paid, interest paid, and depreciation, with deductions for new capital investment and labor intensity. The single business tax is in the process of being phased

out. Beginning in 1998, with the tax rate at 2.3%, businesses will receive a .1% per year reduction until the tax is eliminated. The tax rate reduction is contingent on the balance in the Rainy Day Fund exceeding \$250 million.

The following graph identifies the three major taxes over the past 10 years. Increases in the personal income and single business taxes occurred in spite of reductions in the tax rate. Increases in sales taxes revenues are also the result of the strong economy in prior years.
